LOCATE A RETAILER HERE: [www.yayw.cropperware.com](http://www.yayw.cropperware.com)

The Page-In-Progress Box by Cropperware is a great gift for scrapbookers who often find that they have to stop their projects mid-flow. It is great for Hybrid Scrapbookers that need to take their current page design down to the store to find matching embellishments or papers. The Page-In-Progress box comes with extremely strong magnets that can hold nearly any embellishment and papers in place. When time doesn't allow for scrapbooking simply secure your "in-progress" layout to the box with the magnets and set it aside. The box is designed for 12"x12" pages but can work with a variety of sizes. When closed the box is only 3/4" thick and fits easily into a scrapbooking tote, on the shelf or next to the desk.

To enhance this gift, purchase some papers and embellishments and hide them inside!

With the Xshot in hand everyone can be a part of the scrapbook now and pictures can take on an entirely new angle. Giving the gift of an Xshot puts the faces behind the camera back in front. Make this the year that you give your family the opportunity to be in the picture with you!” – Kristi McFadden

Xshot knows that every scrapbook begins with pictures. Those pictures can now include you. Xshot is a handheld monopod that extends to 37". When not in use the Xshot can collapse down to 9" making it compact enough to fit in the bottom of a purse or in your back pocket. With the Xshot you do not have to worry about people walking in front of your photographs. The Xshot can be attached easily with one hand. This amazing little tool will help you take those pictures that often missed because no one else was around to shoot them. ### 3 Photo Christmas Card

Designs by Julie Mead

This card comes in 2 versions. Both are ready to print. One version comes already colored and the other version allows you to add your own color after printing. Try different mediums for colors such as chalk, water colors, colored pencils, and markers.

There are several options to add your photos to these cards.

- Computer savvy:** while in your photo editing program open up your photos and add them to the card before printing. The black squares will help you size your photos. A separate black template is included to aid with photo sizing. Flatten and print.
- paper savvy:** after choosing which card you want to make, print off the card on your computer. You can cut out the black squares and place your photo behind the front page of the card. Or you can use the photo template included and cut out your photos adhering them with photo tape to the front of the card, covering up the black squares.

**Using the overlay**  
Print the overlay onto a transparency. Any kind will do. To keep the ink from running and insure a good print I recommend a printing pouch like the Perfect Printing Pouch from [www.scraperfect.com](http://www.scraperfect.com). You lightly run the pouch over the transparency before printing. Cut out the frame strip and adhere over the photos using a transparent scrapbooking tape.
